Seventh Edition [Book]

Chapter 11. File-System

Implementation. As we saw in
Chapter 10, the file system
provides the mechanism for
on-line storage and access
to file contents, including

[Book] Chapter 7. Deadlocks.

In a multiprogramming environment, several processes may compete for a finite number of resources.

A process requests resources; and if the resources are not available

Read Online Operating System Concepts 7th

at that time, the process enters a waiting state. Sometimes, a waiting process is never again able to change state, because the resources it has requested are held by other waiting processes.
